

# 6 Cybersecurity Best Practices for Your Hybrid Workforce

Today's hybrid workforce is exposed to unique vulnerabilities that demand proactive cybersecurity measures.

Protect your business with these best practices:

**1. Secure employee's Wi-Fi network**  
Enable strong Wi-Fi encryption and secure home routers. 

**4. Regularly backup data**  
Safeguard your valuable data with a backup and recovery strategy. 

**2. Implement strict password policies**  
Use unique and complex passwords. Encourage employees to use password managers. 

**5. Continuously train your employees**  
Equip employees with the knowledge to spot and report threats. 

**3. Make MFA compulsory**  
Add an extra layer of security by making multifactor authentication (MFA) sign-in compulsory. 

**6. Restrict access**  
Limit access to sensitive data based on roles and responsibilities. 

Don't leave your hybrid workforce vulnerable.
